

Portable Irrigation Pump Unit with Sprinkler

This portable irrigation pump unit is designed for efficient watering of fields and gardens. It features a diesel engine powering a centrifugal pump, mounted on a wheeled cart for easy transport.

Product Overview

Efficient Agricultural Irrigation

This portable irrigation pump unit is designed for efficient watering of fields and gardens, offering a reliable solution for water delivery and distribution. Featuring a powerful diesel engine and a durable centrifugal pump, the system is mounted on a convenient wheeled cart for easy transport across agricultural sites. It includes a versatile tripod-mounted sprinkler head with adjustable nozzles, allowing for customized spray patterns tailored to specific crop needs.

Technical Specifications

Power Source	Diesel Engine
Pump Type	Centrifugal Pump
Mobility Features	Wheeled Cart, Portable, Easy Transport

Sprinkler System

Sprinkler Setup	Tripod-mounted
Nozzle Adjustability	Yes

Application

Ideal Use Cases

- Small-scale agriculture
- Medium-scale agriculture
- Field irrigation
- Garden maintenance
