

Portable Kerosene Space Heater for Indoor Use

This portable kerosene space heater is designed for indoor use. It features adjustable controls, safety shut-off, and a carrying handle.

Product Overview

Efficient Indoor Heating Solution

This portable kerosene space heater is designed to provide reliable and efficient supplemental heating for various indoor environments, including homes, garages, and workshops. It features a robust, durable construction with a protective cage surrounding the heating element for enhanced safety. With adjustable heat output controls and built-in safety mechanisms like automatic shut-off, this unit offers both performance and peace of mind.

Key Features
