

Portable Lead-Acid Battery Charger

This is a portable 12V battery charger with an analog ammeter and selector switch. It is designed for charging lead-acid batteries and has a carrying handle.

Overview

Portable 12V Lead-Acid Battery Charger

This compact and efficient battery charger is designed specifically for 12V lead-acid batteries. Featuring a user-friendly analog ammeter and a selector switch for various charging modes, it offers precise control over the charging process. Its portable design, complete with a convenient carrying handle and alligator clip connectors, makes it an ideal solution for automotive, marine, and industrial battery maintenance.

Technical Specifications

Output Voltage	12 V
Compatible Battery Type	Lead-Acid
Model Identifier	BCA12

Features

Key Features

- Analog ammeter for real-time monitoring
- Selector switch for charging modes
- Integrated carrying handle
- Heavy-duty alligator clip connectors

Compliance	Portable, Automatic Pulse Charging
