Product Overview

High-Efficiency Tunnel Lighting Solution

This high-performance LED tunnel light is engineered for optimal illumination and safety in demanding tunnel environments. Constructed with a robust aluminum alloy housing, the fixture features excellent heat dissipation and corrosion resistance for long-term reliability. Its integrated high-output LED array ensures uniform, bright visibility, making it an ideal choice for both new tunnel installations and retrofitting existing lighting systems.

Technical Specifications

Installation Features

- Adjustable mounting brackets
- Waterproof power connector
- Suitable for new installations
- Suitable for retrofitting

Model Number	GY822SD
Housing Material	Aluminum Alloy
Finish	Silver

Performance Metrics

Key Performance Benefits

Energy-Efficient • Corrosion Resistant • High Heat Dissipation • Uniform Illumination
