

Portable LED Emergency Lantern

This portable LED emergency lantern provides reliable illumination during power outages or where conventional lighting is unavailable. It features high-intensity LEDs arranged in a rectangular configuration to maximize light output and coverage area.

Product Overview

Reliable Emergency Illumination

This portable LED emergency lantern is designed to provide dependable lighting during power outages or in areas without conventional electricity. Featuring 90 high-intensity SMD3528 LEDs, it offers a luminous flux of 420 lumens for effective coverage. With a durable, portable design and a long-lasting sealed lead-acid battery, this lantern is an essential tool for emergency and security lighting applications.

Technical Specifications

Luminous Flux

420 lm

Luminous Flux

LED Quantity	90
LED Type	SMD3528

Power & Battery

Input Voltage	220V 50-60Hz
Battery Type	Sealed Lead-Acid
Battery Configuration	3pcs 4V 1100mAh
Runtime	6-8 hours

Features

Operational Modes	AC/DC, HI/LOW
