

Portable Line Array PA Speaker System with Bass Module

This portable line array speaker and bass module serves as a PA and monitoring system. It is designed for solo musicians and public speakers for audiences of up to 300 people.

Product Overview

Professional Portable Sound Solution

This portable line array PA system is engineered for musicians, DJs, and public speakers who require high-quality audio in a mobile package. Featuring a 12-speaker articulated line array, the system delivers consistent, wide-angle sound coverage of nearly 180 degrees. The included dedicated bass module provides robust low-end reinforcement, ensuring a full-frequency performance suitable for small to medium-sized venues.
