

Portable Magnetic Drill Press

This portable drill press is designed for on-site metalworking. It features a powerful motor and a strong magnetic base for secure attachment to steel surfaces, providing stability and precision during drilling operations.

Product Overview

Portable Magnetic Drilling Solution

This magnetic drill press is designed for high-precision drilling on steel surfaces, making it an essential tool for industries such as construction, bridge building, and shipbuilding. It features a powerful motor with constant power soft-starting and stepless speed regulation, ensuring efficiency and safety in field operations. Its compact, lightweight design allows for use on horizontal, vertical, and overhead surfaces where traditional drilling equipment is impractical.

Technical Specifications

Machine Specifications

Feature	Detail
Arbor Size	MT2
Max Drilling Diameter	23 mm
Variable Speed	Yes
Reverse Tapping	Not Available

Key Features

Performance Highlights

High Adhesion, Over-loading Protection, Constant Power, Stepless Speed Regulation, Soft-starting

Included Accessories

What's in the Box

- Magnetic Drill
- Allen Wrenches
- Instruction Manual
- Safety Belt
- Plastic Carry Case

Applications

Suitable Industries

Building Construction • Bridge Building • Boiler Manufacturing • Shipbuilding
