

Portable Magnetic Drill Press

This magnetic drill press is designed for adhering and drilling on horizontal, side, and top faces. It is widely used in building, bridge building, and shipbuilding industries.

Overview

Versatile Magnetic Drilling Solution

This portable magnetic drill press is engineered for precision drilling on horizontal, vertical, and overhead steel surfaces. Designed for demanding environments like construction, bridge building, and shipbuilding, it offers a practical alternative to stationary drill presses for large workpieces or on-site operations. The unit features constant power output, overload protection, and infinitely variable speed transmission to enhance machining accuracy and operational efficiency.

Key Features

Performance Features

1 Variable

Speed Control

1 Included

Overload Protection

1 Enabled

Constant Power

Applications

Target Industries

Construction, Bridge Building, Shipbuilding, Steel Fabrication, Field Maintenance

Operational Capabilities

Drilling Orientations

- Horizontal level
- Side face
- Top face
