

Portable Mica Space Heater

This portable mica heater uses mica elements to efficiently heat spaces. It includes a mesh front, side controls, caster wheels, and stable feet.

Overview

Efficient Heating Performance

This portable mica space heater utilizes advanced Micathermic heating technology to provide rapid and efficient warmth for your space. Designed with user convenience in mind, it features adjustable heat settings and a manual thermostat to maintain your ideal comfort level. With integrated safety features like overheat protection and a tip-over auto-off switch, it is a reliable solution for both residential and light commercial environments.
