

Portable MIG Welding Machine

This portable welding machine is designed for MIG welding applications. It features adjustable settings for amperage and voltage, along with digital displays and wheels for maneuverability.

Overview

Professional Portable MIG Welding Solution

This portable MIG welding machine is engineered for versatility and ease of use in various welding environments. Featuring intuitive digital displays for precise monitoring of amperage and voltage, it allows operators to fine-tune settings for optimal weld quality. The integrated wheel system ensures excellent maneuverability, making it an ideal choice for mobile welding tasks.

Technical Specifications

Available Models

- 160 (160A model)
- 210 (210A model)

Welding Process

MIG

Mobility Features

Yes
