

Portable Milking Machine with Stainless Steel Bucket

This portable milking machine is convenient and economical for small to medium farms. It features a stainless steel milk bucket, vacuum pump, and pulsation system.

Product Overview

Efficient Milking Solution

This portable milking machine is engineered for efficient and hygienic milk extraction on small to medium-sized dairy farms. It features a robust stainless steel bucket and an integrated vacuum pump with a pulsation system that mimics natural milking action. Mounted on a wheeled chassis, the unit offers excellent maneuverability and consistent performance for daily farm operations.
