Product Overview

Advanced Ultrasonic Misting Technology

This 12-inch portable misting fan combines powerful airflow with ultrasonic misting to provide rapid, refreshing cooling for indoor environments. Featuring a 4L water tank and a 200ml/h evaporation capacity, it ensures long-lasting comfort during hot weather. With versatile wind modes, negative ion air purification, and convenient remote operation, it offers a comprehensive solution for climate control and air quality improvement.

Technical Specifications

Motor Power

100 W
