

Portable MMA 200 Welding Machine

This single-phase AC welding machine is fan-cooled for thermal protection. It features stepless regulation of welding current and is supplied with an electrode holder, earth clamp, helmet, and welding brush.

Product Overview

Compact and Efficient Welding Performance

This portable MMA welding machine is designed for versatility and reliability in construction and repair applications. Featuring advanced inverter technology, it provides stable arc performance and precise current control for professional results. Its compact design ensures ease of transport, while the robust build quality meets international safety and quality standards.

Performance Metrics

Arc Current Range

20 A Min Current	200 A Max Current
