

Portable Multi-Outlet Cable Reel with Overload Protection

This portable cable reel extends power reach with multiple outlets for connecting several devices simultaneously. It has a durable housing, carry handle, and integrated circuit breaker for overload protection.

Product Overview

Reliable Power Distribution

The GEH-005 cable reel is a robust and portable solution designed for extending power reach in workshops, construction sites, and home environments. It features a durable housing with a convenient carry handle for easy transport and storage, alongside multiple outlets for simultaneous device connection. Safety is prioritized with an integrated circuit breaker for overload protection and high-quality, flexible cabling resistant to wear and tear.

Key Features

Key Features

Overload Protection • Portable Design • Multiple Outlets • High Flexibility • Durable Housing

Design & Portability

Transport & Storage

- Integrated carry handle
- Compact reel design
- Robust protective housing

Safety & Protection

Safety Systems

- Integrated circuit breaker
- Automatic overload protection
- Wear-resistant cable insulation
