

Portable Multi-Source Speaker System

This portable speaker system is designed for audio playback from multiple sources. It delivers 25W power output through a 6.5-inch bass driver and piezo tweeter.

Product Overview

Professional Portable Sound Solution

The WML-6 is a versatile, portable multi-source speaker system engineered for high-quality audio reproduction in diverse environments. With a 25W power output and a dedicated 6.5-inch bass driver, it delivers robust sound performance paired with clear high-frequency output from its integrated piezo tweeter. Designed for mobility and flexibility, this system supports multiple playback inputs including Bluetooth, USB, TF card, and FM radio, making it an ideal choice for professional presentations and portable sound reinforcement.
