

Portable Oxygen Concentrator with Digital Display

This oxygen concentrator provides supplemental oxygen with adjustable flow rate. It features a digital display, negative ion function, and is designed for portability in home or clinical settings.

Product Overview

Portable Oxygen Concentrator

This portable oxygen concentrator is designed to provide reliable supplemental oxygen for both home and clinical environments. Featuring an intuitive digital display, the device allows for precise monitoring of oxygen concentration and flow rates. Its compact design includes convenient features such as a negative ion function and a clear water level indicator, ensuring ease of use and maintenance.
