

# Portable Ozone Sterilizer for Air Purification

This portable ozone sterilizer is designed for air purification and sterilization. It features a timer knob for adjustable operation, a power switch, and a fan for ozone distribution.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Ozone Sterilization

The MTS-001 series is a professional-grade ozone disinfection machine designed for high-concentration air purification. It utilizes advanced ozone generation technology to effectively eliminate bacteria, viruses, and toxic gases like formaldehyde and carbon dioxide. Constructed with durable stainless steel, this portable unit is ideal for diverse environments including medical facilities, food processing workshops, and cold storage areas.

## Technical Specifications

Ozone Production	10 g/h
Ozone Concentration	22 mg
Rated Power	100 W
Power Supply	220V/50Hz (Customizable)
Suitable Space	100 m <sup>3</sup>

## Physical Attributes

Housing Material	201 Stainless Steel
Dimensions	350 x 200 x 200 mm
Gross Weight	9 kg

## Performance

Cooling System	Wind Cooled
Air Source	Air
Common Applications	Food Workshop, Medical & Health, Breeding, Cold Storage, Purification Workshop

## Package Contents

### Included Accessories

- Power cord
- Warranty card
- Manual
