

Portable Petrol Generator

This petrol generator provides a portable power solution. It features a robust frame, recoil start mechanism, and various output sockets for connecting electrical devices.

Product Overview

Portable Petrol Generator Series

This range of portable petrol generators is designed to provide reliable power solutions for both professional and domestic applications. With power outputs ranging from 1KW to 7KW, these units are versatile enough to power essential tools, appliances, and equipment in remote locations or during unexpected power outages. Built with robust frames and user-friendly recoil start mechanisms, they are engineered for durability and ease of use in diverse environments.
