Overview

Compact Portable Power

The GS950i is a compact and lightweight inverter generator engineered for versatile portable power needs. It delivers clean, stable energy, making it an ideal choice for sensitive electronics, camping, outdoor events, and emergency backup situations. With features like an efficient ECO mode, parallel capability, and safety protections, it balances performance with ease of use.

Performance

Power Output

120 V

AC Output

12 V

DC Output

4 A

DC Current

Key Features

ECO Mode, Parallel Capability, Overload Protection, Low-Oil Shutdown, Inverter Technology

Safety & Operation

Safety Warnings

- Exhaust outlet and muffler become hot during operation
- Keep flammable items away from the exhaust area
- Do not touch hot surfaces
- Includes overload protection system
- Includes low-oil shutdown mechanism

Connectivity

Available Ports & Controls

Interface	Function
AC Outlet	120V Power Supply
DC Outlet	12V/4A Power Supply
Parallel Outlet	Increased Power Capacity
Reset Switch	Output Reset Function
