

# Portable Pipe Threading Machine

This portable pipe threading machine is designed for creating threads on various pipe sizes. Its compact design allows for easy portability and convenient use in confined spaces.

## ADDITIONAL IMAGES

## Product Overview

### Professional Pipe Threading Solution

The portable pipe threading machine is a robust and efficient tool engineered for creating accurate, consistent threads across various pipe sizes. Featuring a durable construction and an integrated self-oiling system, this machine ensures extended die life and reliable performance in demanding work environments. Its compact design facilitates easy portability, making it an ideal choice for professional pipefitting applications even in confined spaces.

## Technical Specifications

### Die Head Dimensions

**27 mm**  
Height

**10.32 mm**  
Width

Threading Capacity: 1/2 inch to 1 inch

Die Model Identifier: 27103S

## Compliance and Quality

Certifications: CE, ISO9001
