

# Portable Piston Cow Milking Machine

This piston cow milking machine is motor driven and compact. Designed for family use, it can milk one cow in 4-5 minutes.

## Product Overview

### Efficient Portable Milking Solution

This portable piston-type cow milking machine is designed for small-scale and family dairy operations. Motor-driven for consistent performance, it allows for efficient milking of a single cow in just 4 to 5 minutes. The unit is engineered to be easy to operate, helping to save labor while maintaining environmental standards.

## Performance & Efficiency

Milking Time per Cow	5 minutes
Mechanism Type	Piston
Power Source	Motor Driven

## Key Features

Key Advantages	Easy to operate, Labor saving, Environmental friendly, Portable, Compact
Recommended Use	Family dairy use / Small-scale farming

## Technical Details

### System Components

- Stainless steel milk bucket
- Vacuum pump
- Pulsation system
- Milking clusters
- Transparent hoses
- Wheeled chassis
- Pressure gauge
- Control panel
