

Portable Plasma Cutting Machine

This portable plasma cutting machine is designed for metal fabrication. It features an air pressure regulator, cutting torch, power cable, and grounding clamp.

Overview

High-Performance Portable Plasma Cutter

This portable plasma cutting machine is engineered for precision metal fabrication and industrial cutting tasks. Featuring a compact, durable red enclosure, it is designed for mobility without sacrificing power. Equipped with an integrated air pressure regulator, a high-reach cutting torch, and essential grounding components, this unit provides a reliable solution for various metal processing applications.

Key Features

Included Components

- Portable plasma cutting unit
- Air pressure regulator
- Cutting torch with extended hose
- Standard power cable
- Grounding clamp

Design Highlights

Portable Design, Industrial Grade, Metal Fabrication Ready

Technical Specifications

Enclosure Color

Red
