Overview

Professional Grade Power Solutions

These versatile power generators are available in both gasoline and diesel configurations, catering to a wide range of power requirements from compact portable needs to heavy-duty industrial applications. Designed for reliability and ease of use, these units feature various starting systems and output capacities to ensure consistent power supply. Ideal for professional environments, they offer optional enhancements such as ATS, digital smart panels, and mobility kits for improved operational efficiency.

Common_Features

Optional Features

ATS, Three-phase capability, Remote control, Digital Smart Panel, Wheel and handle kit

Gasoline_Generators

Gasoline Generator Specifications

Model	Max Power (W)	Rated Power (W)	Weight (kg)
SU950	750	650	21
SU3000	2800	2500	45
SU6000	5500	5000	80
SU12000	11000	10000	190

Diesel_Generators

Key Performance Metrics

50 Hz

Frequency

15 kVA

Max Power Output

34 L

Max Fuel Capacity

3600 rpm

Max Rotation Speed

Insulation Grade

Class F

Phase Configuration

- Single Phase
- Three Phase
