

Portable Power Generator with High-Pressure Washer

This portable power generator features a high-pressure washer attachment and a robust frame. Equipped with wheels, it offers a versatile solution for power generation and cleaning tasks.

Product Overview

Versatile Power and Cleaning Solution

The GF-368 is a dual-function unit designed for demanding environments, combining a portable power generator with a high-pressure washer attachment. Engineered for mobility, the robust frame and integrated wheels allow for easy transport to construction sites, agricultural fields, and emergency response locations. This versatile machine provides a reliable power source and cleaning capability in areas with limited infrastructure.

Technical Details

Model Number	GF-368
Key Features	Portable Design, Integrated Wheels, Robust Frame, Dual-Function

Applications

Recommended Industries

- Construction Sites
- Agricultural Applications
- Emergency Response
