

Portable Power Generator

This power generator is designed for demanding applications. It features a heavy-duty frame for protection and portability.

Overview

Robust Portable Power Solution

This portable power generator is engineered for demanding applications where reliable electricity is essential. Featuring a heavy-duty frame design, it offers both protection and portability for various worksites or emergency scenarios. It delivers stable and consistent power output, making it a dependable choice for powering essential tools, equipment, and appliances when grid power is unavailable.

Technical Specifications

Power Performance

13000 W

Max Power Output

Model Identifier

DFD13000HS

Durability Features

Heavy-duty frame, Portable design, High-performance engineering
