

Portable Power Tool

This is a portable power tool. Its small size, lightweight design, and built-in wheels make it easy to deliver to any work site.

Product Overview

High-Efficiency Log Splitting

This portable electric log splitter utilizes a 5-ton hydraulic ram to simplify heavy-duty wood processing tasks without the maintenance requirements of gas engines. Designed for durability and safety, its welded steel construction ensures longevity while the two-hand control system keeps operators protected. It is a convenient, plug-and-play solution for efficient and controlled log splitting.

Technical Specifications

Splitting Force

5 ton

Force Capacity

Hydraulic Cylinder Diameter	55 mm
Power Source	Electric

Construction and Safety

Safety Features

- Two-Hand Safety Control
- Enclosed hydraulic ram

Construction Material	Welded steel
Key Benefits	Low maintenance, Portable, Easy operation, Durable
