

Portable Power Tool

This is a portable power tool. Its small size, lightweight design, and built-in wheels make it easy to transport to various work locations.

Product Overview

High-Efficiency Log Splitting

This portable electric power tool provides a robust 4-ton log splitting capacity, driven by a reliable 55mm hydraulic cylinder. Designed to eliminate the maintenance requirements of traditional gas engines, it offers a convenient plug-and-play solution for residential or light commercial tasks. Its durable welded steel construction and integrated safety features ensure long-term reliability and secure operation.

Technical Specifications
