Overview

Professional Pulse Fogging Solution

This portable pulse fogger is engineered for high-efficiency applications in agriculture, sanitation, and pest control. Built with durable 304 stainless steel, it is designed for stable, reliable operation in demanding environments like greenhouses, farms, and public spaces. The dual-start system and high-capacity tanks ensure extended run times and ease of use for professional operators.

Technical Specifications

Model	80K
Dimensions	1150 x 260 x 315 mm
Weight	9.5 Kg

Performance Metrics

Key Performance Metrics

48 cc

Displacement

15 L

Medicine Tank Capacity

2 L

Fuel Tank Capacity

Flow Rate	1.0 - 1.5 L/min
-----------	-----------------

Construction & Design

Start Method

Dual Start • Electric Start

Materials	304 Stainless Steel Frame, 304 Stainless Steel Burst Tube
Battery Type	Lithium battery

Applications

Primary Applications

- Greenhouse pest control
- Greenhouse temperature regulation
- Sanitization of public spaces (hospitals, cinemas, schools)
- Farm and breeding site sterilization
- Mosquito and fly eradication
