

# Portable Radiant Electric Heater

This electric heater is designed for indoor use, providing warmth through radiant heating elements. It features a protective grill to prevent accidental contact with the hot elements and is mounted on casters for easy mobility.

## Product Overview

### Efficient Radiant Heating

This portable radiant electric heater is designed to provide immediate, targeted warmth for indoor environments. Featuring a compact design and integrated casters, it offers exceptional mobility for small to medium-sized rooms. Safety and user control are prioritized with a protective grill and adjustable heating settings via a rotary switch.
