

Portable Radiant Space Heater

This portable radiant space heater is designed for indoor use. It operates by radiating heat from internal heating elements and features a metal safety grill for safety.

Product Overview

Efficient Radiant Heating Solution

This portable radiant space heater provides reliable, localized warmth for indoor environments through its durable steel cabinet design. With selectable power settings and integrated safety features like overheat protection and a tip-over switch, it ensures both comfort and peace of mind. The user-friendly interface features a simple rotary dial control, making it an ideal choice for professional or personal supplemental heating needs.
