

# Portable Radio Receiver

This portable radio receives audio signals for listening. It is designed for easy portability.

## Product Overview

### High-Performance Multi-Core Cabling

This advanced multi-core cable is engineered for maximum reliability in high-stakes environments, featuring specialized fire-resistant construction. Designed to maintain signal and power integrity under extreme conditions, the cable incorporates a multi-layer protective architecture suitable for submarine, land, and civil applications. Its sophisticated engineering ensures compliance with stringent safety standards, making it an ideal choice for critical infrastructure projects requiring long-term durability and fire protection.

## Technical Construction

### Internal Construction Components

- Multi-core configuration
- Fire-resistant insulation
- Protective outer shielding
- Core isolation layers

### Applicable Use Cases

Submarine, Land, Civil Infrastructure

## Performance Standards

### Fire Protection Rating

Fire-Resistant • Engineered Safety

### Key Engineering Metrics

**6 count**

Structural Layers
