

Portable Rebar Cutter

This portable rebar cutter is lightweight and easy to operate. It cuts construction rebar, such as thread steel, round steel, and steel, without sparks or sediment.

Product Overview

High-performance portable bar cutting machine designed for efficient and precise metal cutting operations.

Portable Rebar Cutter

This portable bar cutting machine is designed for efficient cutting of construction rebar, including thread steel and round steel. Its compact and lightweight design makes it easy to operate and transport, while the cutting process is clean, producing no sparks, sediment, or unpleasant smells. Ideal for construction sites and workshops, it offers a reliable solution for various concrete reinforcement applications.

Key Features

Lightweight, Portable, Spark-free, Odorless, Easy to operate

Technical Capabilities

Compatible Materials

- Thread steel
- Round steel
- Construction rebar
