

Portable Rebar Cutter

This portable rebar cutter is designed for cutting rebar on construction sites. The machine features a robust design with wheels and a manual handle.

Product Overview

Professional On-Site Cutting

This portable rebar cutter is engineered for demanding construction environments, offering a robust solution for on-site metal processing. The unit features a durable enclosure and is equipped with integrated wheels, ensuring high mobility across job sites. Designed for efficiency and ease of use, it utilizes a manual operation mechanism to deliver precise cuts.

Technical Specifications

Cutting Capacity	5-125 mm
Mobility Features	Integrated Wheels, Portable Design, Easy Maneuverability

Design & Build

Design Highlights

Robust Enclosure • Manual Operation
