

Portable Rechargeable Barrel Pump

This AC barrel pump is a portable solution for transferring liquids. It features a telescopic design and rechargeable battery.

Overview

Portable Liquid Transfer Solution

The Portable Rechargeable Barrel Pump is a versatile and efficient tool designed for seamless liquid transfer. Featuring a telescopic design for adjustable height and easy storage, it is ideal for environments where power access is limited. Equipped with a digital display for performance monitoring and a quick-connect hose system, this pump ensures controlled and reliable dispensing for various industrial and commercial applications.
