

Portable Refrigerator

This portable refrigerator is a versatile cooling solution for different uses. It features durable construction and precise temperature control for consistent cooling.

XC70

Overview

Professional Mobile Cooling Solution

The XC70 mobile refrigerator is a high-performance cooling solution engineered for durability and reliability in demanding environments. Designed for versatility, it is ideal for integration into vehicles, outdoor setups, and various mobile applications. With precise temperature control, efficient insulation, and a secure latching system, it ensures consistent cooling performance while maintaining low power consumption.

Features

Key Features

- Precise temperature control
- Secure latching system
- High-efficiency insulation
- Robust construction

Suitable Applications

Vehicles, Outdoor Activities, Mobile Refrigeration
