Product Overview

Control and adjustment interface for precise tap positioning.

Precision Tap Grinding Solution

This portable screw tap grinding machine is engineered for high-precision re-sharpening and maintenance of screw taps. Designed to improve machining efficiency and extend the lifespan of your tooling, it allows for the accurate grinding of the front cutting face and cutting lip. The unit features an electrically controlled high-rate DC motor for stable, reliable power, making it a cost-effective solution for workshops looking to reduce annual blade replacement expenses.

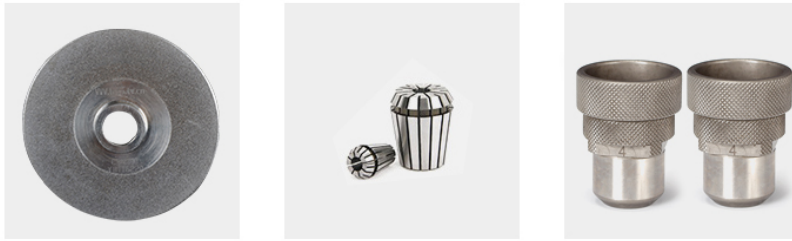

Technical Specifications

Compact and portable design suitable for various workshop environments.

Grinding Range	M5-M20
Point Angle	5°-30°
Motor Power	160 W
Rotation Speed	4400 rpm
Power Supply	AC220V
Dimensions	36 x 27 x 31 cm
Weight	16 kg

Standard Equipment

Standard grinding components and collet system.

Included Components

- 1 x CBN Grinding Wheel (for HSS)
- 6 x Collets (I5, I7, I8, I9, I13, I14)
