Product Overview

Versatile Power for Outdoor Professionals

This portable solar power solution provides reliable energy for high-demand electronics like laptops, smartphones, and cameras. Integrated with a multicrystal silicon solar panel and a high-capacity 12000mAh battery, it offers flexible charging options via solar power or AC/DC input. Designed for field use, it also includes an ultrasonic mosquito repellent and a high-intensity LED flashlight for added utility in remote environments.

Power & Capacity

Battery Capacity

12000 mAh
Capacity
