

Portable Solar Power Generator with Integrated Battery

This self-contained portable solar power generator is housed in a rugged aluminum case. The unit features integrated solar panels, an internal battery, and a control panel with output ports and indicators.

Product Overview

Rugged Off-Grid Power Solution

This portable solar power generator is an all-in-one energy solution housed in a durable aluminum casing. It seamlessly integrates solar panels and a high-capacity internal battery to provide reliable electricity in remote locations or during emergencies. Designed for mobility and ease of use, the unit features a secure-latch handle and a comprehensive control panel, making it an ideal choice for off-grid operations and mobile power needs.

Design and Build

Housing Material	Aluminum
Design Features	Portable, Rugged, Integrated Handle, Secure Latches

Technical Specifications

Power Source

- Integrated Solar Panels
- Internal Battery

Primary Applications

Off-Grid Power • Emergency Backup • Mobile Power
