

Portable Solar Powered LED Lighting Tower

This portable lighting tower utilizes solar energy to power its high-intensity LED floodlights. The system is mounted on a trailer for easy transport and provides a clean, silent alternative to traditional diesel-powered lighting.

Product Overview

Sustainable Illumination Solution

This portable solar-powered LED lighting tower offers a clean, noiseless, and pollution-free lighting solution for demanding outdoor environments. Engineered for efficiency, it features adjustable solar panels and high-capacity batteries to ensure reliable performance over extended periods. With a telescoping mast reaching up to 6.2 meters, it provides versatile and high-intensity illumination for construction sites, road repairs, and emergency operations.

Technical Specifications

Lighting System

4 units

Number of Lights

100 W

Power (Option 1)

150 W

Power (Option 2)

Solar Panel Array

4 count

Panels

250 W

Capacity per Panel

Battery Storage

4 count

Batteries

200 Ah

Capacity per Battery

Model

4VS400/600

Mast & Deployment

Mast Type

Manual, vertical

Max Extended Height

6.2 meters

Mast Sections

5

Features & Logistics

Key Features

Clean Energy, Noiseless, Pollution-Free, Low Maintenance

Optional Backup

Yes
