

Portable Solar Rechargeable Fan with Fluorescent Light

This portable fan is equipped with an integrated solar panel for convenient recharging. It features a built-in fluorescent light and adjustable fan speeds.

Product Overview

Versatile Solar-Powered Cooling and Lighting

This portable solar rechargeable fan is designed for convenience and reliability in off-grid or emergency situations. Featuring an integrated solar panel for sustainable charging, it combines powerful airflow with a built-in fluorescent light source. The unit is housed in a durable white plastic casing with intuitive slider controls, making it an essential tool for camping, power outages, or outdoor activities.
