

Portable Spot Welder

This compact and portable welding machine is designed for various welding applications. It features adjustable current control for precise welding and an easy-to-use on/off switch.

Product Overview

Compact Welding Solution

The Portable Spot Welder is a versatile and compact machine engineered for a wide range of welding applications. Designed with robust construction, it offers durability suitable for both professional environments and DIY projects. The unit features adjustable current control for precise results and includes clear operational indicators for ease of use.

Technical Specifications

Output Type	DC
Minimum Current	110 A
Current Control	Yes

Features

Key Features

- Portable design
- Adjustable current control
- Clear positive/negative terminals
- Operational status indicator lights

Suitability	Professional Use, DIY Projects, Portable Welding
