

# Portable Spot Welding Machine

This is a compact and portable welding machine for spot welding. It features adjustable amperage control and clearly labeled terminals.

## Overview

### Compact Welding Solution

This portable spot welding machine is engineered for efficiency in light-duty welding applications. Its compact form factor allows for easy transport and setup, making it a versatile tool for various repair and assembly tasks. Featuring adjustable amperage controls and clear terminal markings, it provides users with precise control and reliable performance.

## Technical Specifications

### Amperage Range

**200 A**

Max Current

### Voltage Settings

- 115
- 100

### Control Interface

- On/Off Switch
- Adjustable Amperage Control
- Positive Terminal
- Negative Terminal

### Key Features

Portable, Compact, Adjustable Amperage, Light-duty
