

Portable Sprinkler Irrigation Unit

This portable sprinkler irrigation unit is designed for efficient watering of agricultural fields and gardens. It features a self-priming centrifugal pump powered by a gasoline engine and is mounted on a wheeled frame for easy transport.

Product Overview

Portable Sprinkler Irrigation System

The ZP-4S-1 is a highly mobile sprinkler irrigation unit engineered for efficient water distribution in agricultural fields and gardens. It features a self-priming centrifugal pump driven by a reliable gasoline engine, all mounted on a sturdy wheeled frame for maximum portability. With an adjustable sprinkler head and a stable tripod stand, this unit provides uniform coverage for small to medium-sized irrigation areas.

Technical Specifications
