

Portable Stereo Speaker with Integrated Amplifier

This portable stereo speaker features full function protection for the integrated power amplifier and delivers pure sound quality. Its telescopic resonant cavity enhances bass, while the aluminum metal diaphragm ensures soft, warm natural voice.

Product Overview

Compact Portable Stereo Audio

This portable stereo speaker system features an integrated amplifier and a telescopic resonant cavity designed to enhance bass performance. Equipped with aluminum metal diaphragm loudspeakers, the system delivers a soft, warm, and pure sound quality. The unit is designed with antimagnetic properties to prevent signal interference with electronics such as computer monitors or TVs.

Technical Features

Safety Functions

- Integrated power amplifier protection
- Automatic shutdown on insufficient power
- Battery health protection

Design Features

Antimagnetic, Telescopic Resonant Cavity, Aluminum Metal Diaphragm

Operational Controls

Volume Settings

OFF • MID • HIGH

Cable System

Integrated contractile roller-type pulley design for audio and power lines
