

Portable Tire Inflator Air Compressor

This portable air compressor is designed for inflating tires and other inflatable items. It features a built-in pressure gauge with dual scales (kg/cm² and lb/in²) for accurate inflation.

Product Overview

Compact Portable Air Compressor

This portable air compressor is an essential tool designed for rapid tire inflation and versatile use with various inflatable items. Featuring a compact, tire-shaped design, it ensures easy storage and portability for vehicle owners and outdoor enthusiasts alike. The unit operates via a standard DC 12V cigarette lighter connection, providing reliable performance for car tires, bicycle tires, and sports equipment.
