

Portable Travel Refrigerator

This portable refrigerator is designed for both cooling and freezing food and beverages. It features a durable design with a digital display and operates on both AC and DC power for versatile use during travel, camping, and other outdoor activities.

Product Overview

Portable Travel Refrigerator

This portable refrigerator is designed for travel, camping, and outdoor activities, featuring a DC frequency conversion compressor for low-noise, rapid cooling. It offers versatile temperature control ranging from 10°C down to -18°C, allowing for both refrigeration and freezing capabilities. Built with a high-density PU insulation layer and low-voltage battery protection, it ensures both efficient performance and safety for your vehicle's power system.

Performance & Cooling

Temperature Range

10 °C
