

Portable Twin-Tank Air Compressor

This air compressor is engineered for efficient and reliable performance in industrial and general-purpose applications. Its twin-tank design increases air storage capacity, while pressure gauges and a regulator allow for controlled output.

Overview

Industrial Performance in a Portable Package

This piston compressor is engineered for reliability and efficient performance across a variety of industrial and general-purpose applications. Featuring a robust twin-tank design, it offers increased air storage capacity to maintain a consistent supply for pneumatic tools. Designed with mobility in mind, the unit includes integrated wheels and a handle for easy maneuverability on the job site.

Technical Specifications

Model Number	ZB-0.1/8-BM-5GHP
Compressor Type	Piston

Features

Mobility

- Integrated Handle
- Wheels for easy transport

Design Features	Twin-Tank Design, Portable, Pressure Gauges, Pressure Regulator
