Overview

Portable UV Sterilization Solution

This portable UV sterilizer wand offers a convenient and effective way to maintain a hygienic environment at home, in the office, or while traveling. Designed with safety in mind, it features a gravity-sensing mechanism that automatically disables the light if the device is flipped. With a powerful combination of UVC and UVA LEDs, it achieves a sterilization rate of over 99% in just three minutes.

Technical Specifications

Power & Performance

5 W

Wattage

1200 mAh

Battery Capacity

3 min

Cycle Time

Light Configuration

- 6 x UVC LEDs
- 6 x UVA LEDs
- Wavelength: 270-280nm

Design & Safety

Safety Features

Gravity Sensing • One-key Operation • Auto-Flip Shutoff

Build & Durability

ABS Housing, IP20 Rated, Portable Design

Sterilization Efficacy

99 %
