Product Overview

High-Performance Portable Ventilation

This portable ventilator features a CAD-optimized design for blades and air outlets, delivering high pressure and high-volume airflow. Equipped with a pure copper motor for an extended service life, it is engineered for reliability in demanding industrial environments. Its flexible handle and versatile base allow for easy movement and precise airflow directioning across various job sites.

Technical Specifications

Motor Construction	Full pure copper
Design Optimization	CAD-optimized blades, High pressure output, Large airflow volume

Operational Details

Recommended Applications

- Underground construction
- Telecommunications maintenance
- Tunnel repair projects
- Confined space ventilation

Portability & Handling

Flexible handle • Movable design • Vibration-reducing base

Ducting	Yes
