

Portable Water Transfer Pump

This portable unit features a centrifugal pump coupled with an electric motor. Mounted on a protective frame, the assembly is designed for water transfer applications such as irrigation and drainage.

Overview

High-Efficiency Water Transfer Solution

This portable water transfer pump is engineered for reliable performance in demanding environments. Featuring a robust centrifugal pump coupled with a high-performance electric motor, the unit is housed within a protective frame for enhanced stability and ease of transport. It is an ideal solution for irrigation, drainage, and general water management applications requiring consistent flow and durability.

Technical Specifications

Construction Materials

- Silver-colored pump housing
- Blue electric motor casing
- Black protective steel frame

Pump Type	Centrifugal
Key Design Features	Portable Frame, Electric Motor, Cooling Fins, Centrifugal Design

Applications

Primary Applications

Irrigation • Water Drainage • General Water Transfer
